

the colours of this day

2017

lyrics

1

main 1

When I got out today pictures came into my mind
I went to the shore my eyes followed the waves
I went to the past my mind got into the deep

Far colours – new frames
That's where I go here today

chorus

And I I I I I – I didn't understand this day
And I I I I I – I was enchanted by this wave
Right here I float into the surface of this planet
Right now I dive into the colours of this day

main 2

I tried to follow the pictures in my mind
I walked along to a well hidden corner
The wind in my face I stepped on a sharp edge

Far colours – new frames
That's where I go here today

chorus

And I I I I I – I didn't understand this day
And I I I I I – I was enchanted by this wave
Right here I float into the surface of this planet
Right now I dive into the colours of this day

solo

chorus

And I I I I I – I didn't understand this day
And I I I I I – I was enchanted by this wave
Right here I float into the surface of this planet
Right now I dive into the colours of this day
